Response to Claim Rejections - 35 U.S.C. § 102

Claims 1, 9 and 23-29 were rejected under 35 U.S.C. § 102(b) as being anticipated by Yoshizawa et al. JP 2-50379 A. Claims 1, 9 and 23-29 were rejected on the basis that Yoshizawa discloses a flow controller or spoiler (7) including a flow device or spoiler tooth (13) including a leading edge having a plurality of inlets and a trailing edge including a plurality of outlets and a plurality of streamline flow passages (12) between the plurality of inlets and the plurality of outlets. Claims 1 and 9 have been amended to recite a flow controller including a flow gate and the flow gate including a plurality of rows of inlets at the leading edge and a plurality of row of outlets at the trailing edge and a plurality of rows of streamline flow passages therebetween which is not taught nor suggested by Yoshizawa and which provides flow control advantages as described in Applicants' specification.

Claims 23-29 have been amended to recite a plurality of streamline flow passages including a plurality of opened channels between opposed side edges extending between a plurality of inlets and a plurality of outlets which is not taught nor suggested by Yoshizawa and which provides flow control advantages as described in Applicants' specification.

Response to Claim Rejections - 35 U.S.C. § 103

Claim 11 was rejected under 35 U.S.C. § 103 as being unpatentable over Yoshizawa JP 2-50379. Claim 11 is dependent upon amended claim 1 which as amended is allowable over Yoshizawa.
